

PUGAZHENTHI J

Cybersecurity Enthusiast | Ethical Hacker | Penetration Tester | CTF Player

Chidambaram, Tamil Nadu, India | +91 8608442802 | pugazhenthij283@gmail.com | linkedin.com/in/pugazh28
| TryHackMe: pugazhenthij283 | github.com/pugazhexploit

PROFESSIONAL SUMMARY

Motivated and passionate Cybersecurity student at AVC College (Autonomous), Mayiladuthurai, with hands-on experience in Ethical Hacking, Penetration Testing, Web Security, Cryptography, OSINT, and Forensics. Active CTF competitor with proven competition achievements including 14th place (9737+ points) in Chaitanya CTF. Certified Cybersecurity Educator Professional (CCEP) with strong project development skills combining AI, FastAPI, and security tools. Consistently ranked in TryHackMe weekly leagues with a 30-day streak. Seeking to contribute technical skills in a cybersecurity role.

EDUCATION

Bachelor of Science (B.Sc) — Computer Science | AVC College (Autonomous), Mayiladuthurai 2024 – 2027
Tamil Nadu, India

- Specialization focus: Cybersecurity, Ethical Hacking, and AI-driven systems
- Active member of Team ASTRA — cybersecurity research and CTF competition team

INTERNSHIP EXPERIENCE

Web Developer, Stage Designer & Book Wrapper Designer | Ilanhoodhu Student Magazine, AVC College (Autonomous), Mayiladuthurai 2 Years | Internship

- Worked as Web Developer for Ilanhoodhu, the student magazine of AVC College (Autonomous), Mayiladuthurai, building and maintaining the magazine's web platform
- Served as Stage Designer, planning and executing stage setups for magazine launch events and college programs
- Designed book wrappers and cover layouts for magazine publications
- Completed a 2-year internship combining web development, stage design, and book/print design

TECHNICAL SKILLS

- **Cybersecurity:** Penetration Testing, Ethical Hacking, Web Application Security, OSINT, Cryptography, Forensics, Network Security, CTF
- **Programming & Scripting:** Python, JavaScript, HTML, CSS, Bash/Linux
- **Frameworks & Tools:** FastAPI, React.js, Telegram Bot API, GIS Mapping, Gemini AI API
- **Platforms:** Kali Linux, TryHackMe, CTF platforms, GitHub
- **AI & ML:** Prompt Engineering, Machine Learning, Geospatial AI, Google Gemini API
- **Other:** Token Authentication, Secure API design, Remote Shell Systems, Telegram Automation
- **Cloud Computing:** AWS (IAM, S3, CloudFront, EC2) — Beginner level

PROJECTS

MCP Terminal — FastAPI Remote Shell + AI Cybersecurity Assistant | 2025

- Developed a FastAPI-powered Remote Shell System integrated with Gemini AI for cybersecurity tasks and CTF challenges via a web-based terminal UI.
 - Features: Model Context Protocol (MCP) communication, web-based terminal, real-time CTF support, secure token authentication
 - Tech Stack: Gemini AI, FastAPI, Linux Terminal, HTML/CSS/JavaScript, Network Security
 - Purpose: Empower cybersecurity learners to practice Linux commands, solve CTF flags, and automate pentesting tasks
- GitHub: github.com/pugazhexploit/mcp-terminal

AI-Agent-Sara V2.0 — Telegram AI Automation Bot |

2025

- Built an intelligent Telegram bot using Google Gemini API + Python with automated email generation, cybersecurity learning assistance, and natural language interaction.
 - V2.0 Features: Automated email letter generation, AI-powered email writing, relationship memory style responses, multi-command automation flow
 - Tech Stack: Python, Google Gemini API, Telegram Bot API, SMTP email automation
 - Deployable on Render, Replit, or VPS; fully open-source and customizable
- Commands: /start, /email, natural language chat for cybersecurity guidance and OSINT tips

RuralCare-Map-AI — AI-Powered Geospatial Rural Healthcare Platform | [Competition Project \(2nd Prize — TN Govt Youth Literary Festival\)](#)

2025

- Developed an AI-driven geospatial healthcare platform to improve healthcare accessibility in rural Tamil Nadu for the Prompt Engineering competition.
 - Integrates demographic data, GIS mapping, and machine learning to identify vulnerable areas and predict health risks
 - Interactive map-based dashboard with real-time vulnerability scores for authorities and healthcare workers
 - Supports ambulance routing optimization, mobile clinic deployment, and emergency response planning
 - Tech Stack: React.js, Python, Prompt Engineering, AI/ML, GIS Mapping
- Awarded 2nd Prize + Rs. 4,000 cash by District Collector Srikanth H.S at Tamil Nadu Government Youth Literary Festival 2025

WebPyS — Web Pentesting, Vulnerability & Subdomain Scanner |

2025

- Built a powerful passive recon and vulnerability scanner in Python for web penetration testing and attack surface mapping.
 - SSL analysis, HTTP header auditing, WAF detection, and subdomain enumeration
 - Integrates Nmap for port scanning and Nuclei for active vulnerability scanning
 - Generates detailed reports in TXT, HTML, and XML formats for easy analysis
 - Tech Stack: Python, Nmap, Nuclei, SSL/TLS analysis, DNS enumeration
- GitHub: github.com/pugazhexploit/Webpys

CERTIFICATIONS

- **Certified Cybersecurity Educator Professional (CCEP)** — Red Team Leaders (2025)
- **TryHackMe — Active Learning Path Completion** — TryHackMe (2024–2025)

ACHIEVEMENTS & COMPETITIONS

- 14th Place (Solo) — Chaitanya CTF, scoring 9,737+ points across Web Security, Cryptography, OSINT, Forensics, and Reverse Engineering (2025)
- 2nd Prize + Rs. 4,000 Cash Award — Prompt Engineering Competition, Tamil Nadu Government Youth Literary Festival 2025, awarded by Mayiladuthurai District Collector
- 2nd Place — TryHackMe Weekly League with 816 points; earned 2 Gold Tickets for consistent performance
- 30-Day TryHackMe Streak — Consistent daily practice across hacking rooms and challenges
- 1st Place — MIME Event, National Level Intercollegiate Meet, Rabiyyammal Ahmed Maideen College, Thiruvavur
